General Description

Siretta's QUARTZ-LITE 4G/LTE router is a high speed industrial router designed for transferring large amounts of data via the cellular network. The QUARTZ-LITE 4G/LTE's fast data transfer capability reaches up to 100Mbps download and up to 50Mbps upload speed. It also has fall-back to 3G/UMTS communication, should 4G/LTE be unavailable. It is well suited for IoT/mobile broadband applications, offering reliable, secure wireless connectivity.

The QUARTZ-LITE 4G/LTE router is of a robust design, coming in a small sized, metal enclosure, making it ideal for deployment in industrial embedded applications. Cellular coverage is designed to match European frequencies. The QUARTZ software means VPN security is supported, allowing the router to be used in

commercial as well as industrial applications. The QUARTZ-LITE 4G/LTE router meets many of the needs for management of remote communication, and therefore has applications in renewable energy, security, digital signage, transport, street furniture, traffic control, parking systems, environmental monitoring, and many other IoT/mobile broadband applications.

The QUARTZ-LITE router comes as standard with a single SIM slot, dual port ethernet capability, and has the option to come with, or without, Wifi. It also has optional GPS capability, which means the router is ideal for asset tracking or access management.
